Lab 1 - Outline Foundation
Green Team

1. Introduction

Introduce the CS 410 product and the approach to demonstrating its characteristics through prototyping (essentially an abstract). This section should:

1.1. Summarize the societal problem with some reference/date support.

1.2. Outline problem and needed solution characteristics.

1.3. Briefly introduce your product by name

2. VolunteerHub Product Description

Provide a top-level description of CS 410 product for the average reader. Provide a summary of the solution –- and its goals and objectives. This section should be one paragraph minimum.

2.1. Key Product Features and Capabilities

What does it do? What is significant/unique/innovative about it? What does it accomplish? Describe how this solves the problem.

2.2. Major Components (Hardware/Software)

Provide an overview of the hardware needed to support the solution. Describe how it is structured based on CS 410 MFCD. Define and describe the software to be developed

3. Identification of Case Study

For whom is this product being developed? Why? Who else might use this in the future?

4. Glossary

Alphabetical list of terms and abbreviations.
HTML - HyperText Markup Language
IDE - Integrated Development Environment
PII - Personal Identifiable Information
POC - Point of Contact
REST API - Representational State Transfer Application Programming Interface
MYSQL - open-source relational database management system (RDBMS) that uses Structured Query Language (SQL) to store, manage, and manipulate data (*MySQL Introduction*, n.d.)
Spring Boot - open java frameworks that eases creating stand-alone, production-grade web applications and microservices (*Spring Boot*, n.d.)
